

TECHNICAL BULLETIN

PROGRESSING CAVITY PUMPS | LS-TB-015

BULLETIN NO.

LS-TB-015 V1

TOPIC

PC PUMP LAYOUTS, OVERVIEW AND ISO DATASHEET

ISSUE DATE

MARCH 9 2020

ISSUED BY

ENGINEERING

BACKGROUND

In effort to digitize the flow of information about our Progressing Cavity Pump (PCP) Product Line a Specification Configurator has been setup in the Product Tracking System. This self-serve module is designed to provide specification information to internal users. PDF versions can be printed and emailed to Clients/End Users if required.

FILTERING INTERFACE

The filtering interface allows you to narrow the selection to a single pump configuration as required. It can be found under the PCP SPEC Tab then in the right-hand menu item under Pump Spec Filter as shown below.

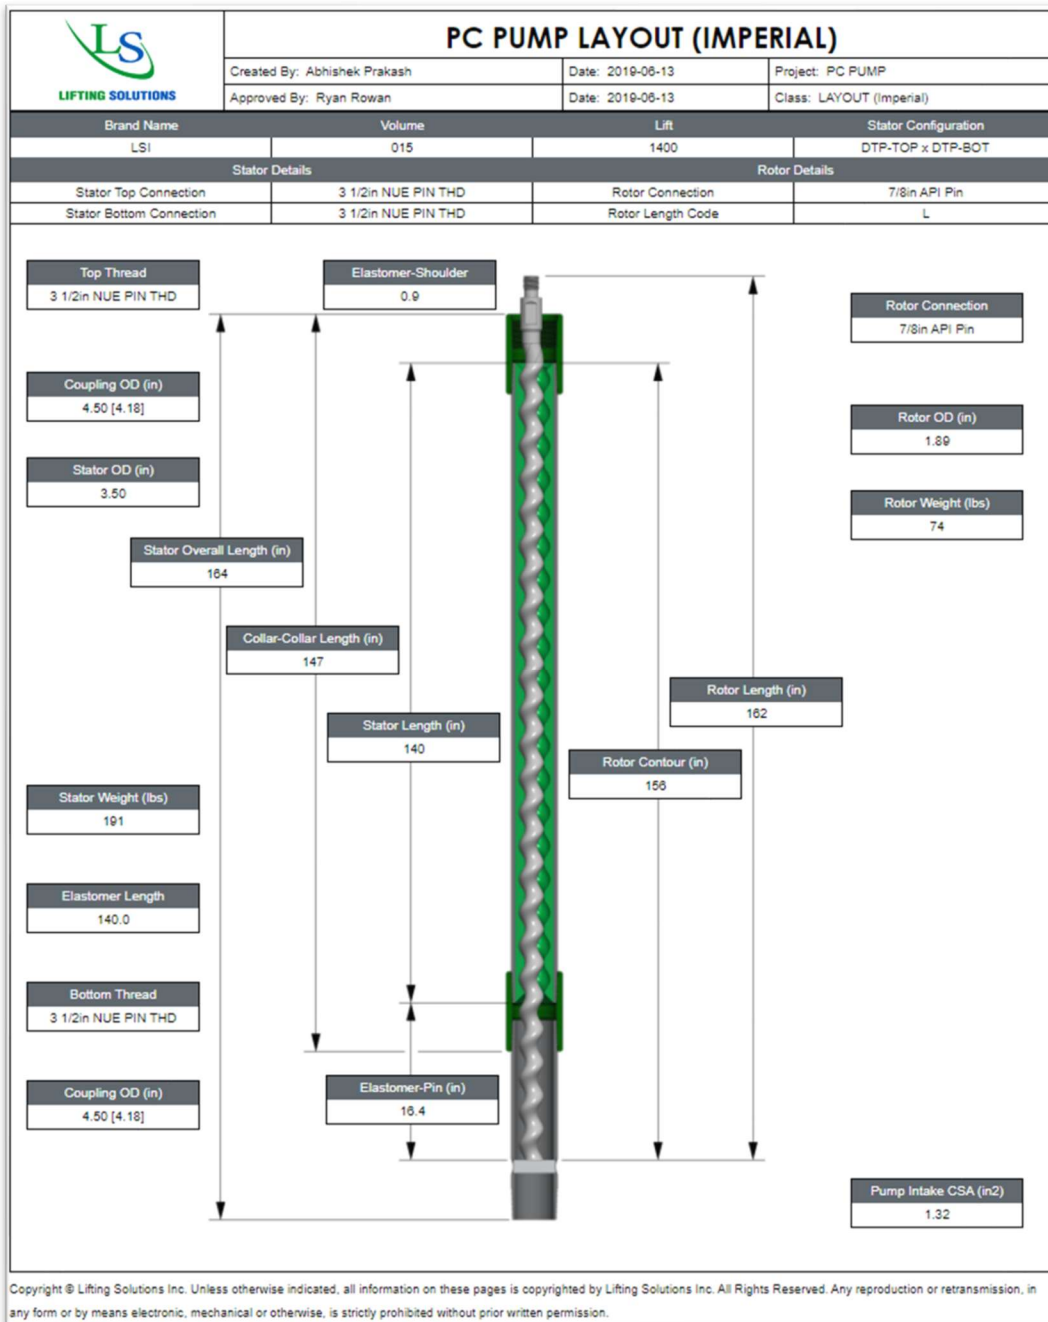

The screenshot displays the 'PRODUCT TRACKING SYSTEM (TRACK)' interface. The top navigation bar includes 'Home', 'Admin', 'Automation', 'PCP TRACK', 'PCP SPEC' (highlighted), 'PCP MFG', 'PCP ENG', 'Endless Rod', 'Pumping Units', and 'Sucker Rod'. A left sidebar menu lists 'Specification', 'PCP Layout', 'PCP Datasheet', 'Model Overview', and 'Pump Spec Filter' (highlighted). The main content area is titled 'Report Filter' and contains the following configuration options:

- Pump**
 - OEM: LSI-SL
 - Family: C
 - Model Name: 015
 - Lift: 1400
- Stator**
 - Connection Type: DTB-TOP x DTB-BOT
 - Elastomer Type: MN1
- Rotor**
 - Connection Type: R-STD1
 - Rotor Length Code: L
- Model Approval Status**
 - Model Engineering Status: Approved
 - Model Sales Status Domestic: Approved
 - Model Sales Status International: Approved
- Reports**
 - Reports to Open: Layout, Datasheet, Model Overview

An 'Open Reports' button is located at the bottom of the filter section.

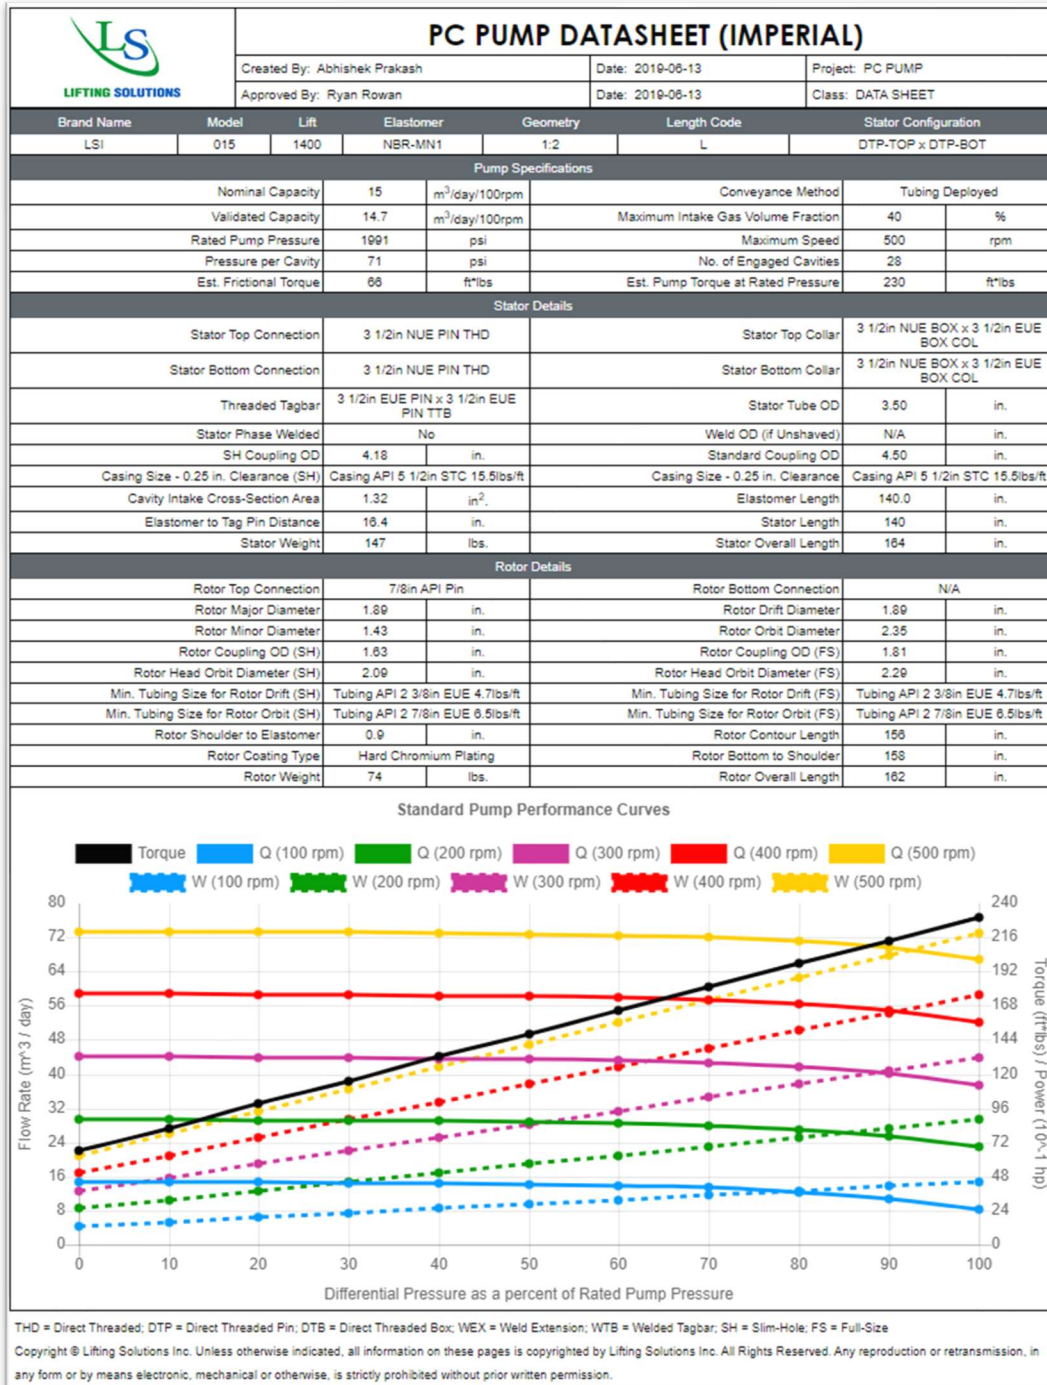

PCP LAYOUT

The PCP Layout graphically represents overall dimensions and connection specifics for each model returned in the filter results. The image rendering is representative of the specified connection configuration and true PCP geometry. These reports can be generated for any PCP model configuration currently available.

PCP DATASHEET

The PCP Datasheet gives you a tabular view of relevant PCP geometry and configuration information based on ISO 15136 requirements. It builds a chart for each model that shows the power requirements (W, hp) and flow rate (Q, m³/day) at different speeds as well as the theoretical torque requirement (T, ft*lbs).

PCP OVERVIEW

The PCP Overview gives a general overview of a specific PCP geometry. This report requires you to select a model name, stator connection type, stator elastomer type, rotor connection type and rotor length code as a minimum to generate the model overview report. Lift is optional and if left blank, the report will return all the available lifts for that specific model as shown below.

LS LIFTING SOLUTIONS		MODEL OVERVIEW (IMPERIAL)

8	3000	3 1/2in EUE PIN THD	190	3.75	4.5	1in API Pin	L	212	2.09	2.52		
8	3600	3 1/2in EUE PIN THD	228	3.75	4.5	1in API Pin	L	250	2.09	2.52		
Pump Model Series Description												
CHOPS (Sandy Heavy Oil)												
Family Scope												
Direct Thread Pin 3.500in EUE Pump Family (Tube 3.750in OD). Coilable with 3/4in Coil inside 3 1/2" EUE Tubing (With 0.125" Clearance Minimum). STD1, 278-512MM, Rotor Drifts 2 7/8" Tubing (2.347" Drift ID), Stator Drifts 5 1/2" Casing (4.825" Drift ID). OPT2, 278-412SM, Rotor Drifts 2 7/8" Tubing (2.347" Drift ID), Stator Drifts 4 1/2" Casing (3.927" Drift ID). OPT3, Not Available.												
Stator Configuration												
STD1, Stator Connection, 3 1/2" EUE Direct Thread Pin with 3 1/2" EUE Coupling (4.180" Max OD). OPT2, Stator Connection, 2 7/8" EUE Welded Extension with Welded Tagbar (3.750" Max OD). OPT3, Not Available.												
Rotor Configuration												
STD1, Rotor Connection, 1" API Pin. OPT2, Not Available. OPT3, Not Available. Available in STD + 0in (S), Extended +8in (L) and Paddled +24in (P) Rotor Length Codes (RLC).												
Tagbar Configuration												
STD1, Tagbar, 3 1/2in EUE. OPT2, Not Available. OPT3, Not Available. Available in SOLID (No Slots) or SLOTTED (1.500in Slots) Tagbar Configurations.
