

DRIVING INNOVATION FOR A SUSTAINABLE FUTURE

Lifting Solutions' engineers and manufactures artificial lift products and delivers related services to optimize oil and gas production systems. With locations across the world, our team of technical specialists have the knowledge and experience to support your artificial lift needs to outperform the market!

EXPERIENCE

Our team is made up of artificial lift specialists. From engineering to applications, to client solutions – we listen first, look for ways to add value, and push hard for results to deliver more than is expected.

PERFORMANCE

Our team, products, and services consistently outperform the market to get better results for our clients. Designed for your well, our artificial lift products are manufactured to the right specifications to deliver the performance you need.

TECHNOLOGY

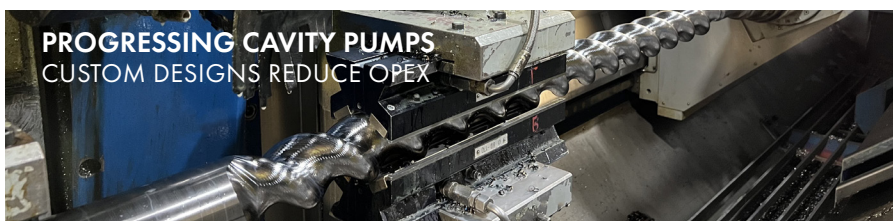

Some challenges are best addressed by employing game-changing technologies in the development of products and digital applications. These innovations integrate into the high-performance products and services that we deliver.

GLOBAL REACH

From North America, South America, Europe, Asia and Australia, our products and services are delivered across the globe. We have a team of global artificial lift specialists who understand the unique applications requirements no matter where your wellsite is.

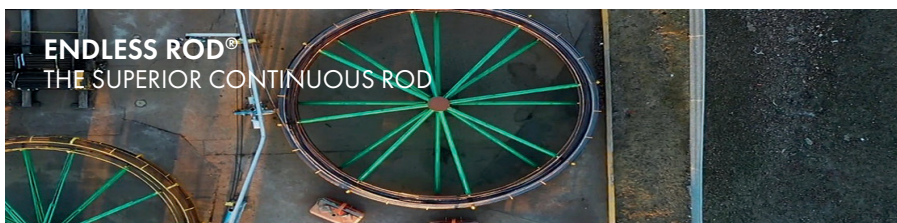

VERTICALLY INTEGRATED MANUFACTURING

Our unwavering commitment to excellence has earned us a trusted reputation among energy companies worldwide. Our approach is rooted in vertically integrated manufacturing, stringent quality controls, and certifications including ISO 9001:2015 for our state-of-the-art manufacturing facilities.

PROGRESSING CAVITY PUMPS
CUSTOM DESIGNS REDUCE OPEX

Our PC Pumps are designed to outperform the market. We have the most reputable and pioneering minds in PC Pump artificial lift who innovate our product lines to better meet the challenges our clients face at the wellsite. We complete extensive engineering validation in our advanced materials laboratory and are **ISO 15136-1** compliant. Our 75,000 sq.ft facility has a design output capacity of 10,000 pumps per year. With over 16,000 Progressing Cavity Pumps installed, we are confident our pumps outperform!

ENDLESS ROD®
THE SUPERIOR CONTINUOUS ROD

Lifting Solutions is the industry-leading provider of continuous rod products and services. We have over 28,000,000 feet of Endless Rod installed. With two manufacturing facilities, one in Canada with an output capacity of 8,000,000 feet per year; and a ~40,000 sq.ft facility in Oman with the capability to produce over 6,500,000 feet per year. From research and development to design, to quality and precision manufacturing; our Endless Rod products outperform the market.

ENDLESS ROD® SERVICES
RELIABLE PERFORMANCE

With the largest service fleet globally of 74 units, our field service professionals provide the highest service quality to our clients, ensuring that we consistently meet their needs with unparalleled efficiency. Our clients rely on us and deliver results to save them OPEX.

EXPERIENCE PERFORMANCE.

Artificial lift products and services that consistently outperform the market and reduce OPEX.
