

# ENDLESS ROD™ FIELD WELDER

SAFE, RELIABLE ON-SITE  
WELDING MOUNTED

## LEADING PERFORMANCE

As a fully-mobile unit, the Lifting Solutions Field Welder brings welding solutions directly to well-sites for efficient continuous rod string welding. On this unit, the welding system is mounted onto a Class 8, on-road/off-road severe-duty truck that is capable of hauling up to 19,000 lb (8,618 kg) of continuous rod (when paired with the Lifting Solutions transport trailer).

## FEATURES AND BENEFITS

- Automated rod heating, aligning, welding, and quenching processes enhance product performance and consistency while reducing the need for rework and improving rig safety
- Equipped to pull Lifting Solutions transport trailers, which can haul up to 10,900 ft (3322 m) of Endless Rod continuous rod, eliminating the need for extra equipment unit
- NDT equipment is included for performing weld inspections and ensuring reliable quality control
- Daytime and nighttime operation

## APPLICATIONS

- Assisting with installing continuous rod strings
- Adjusting continuous rod string lengths
- Welding pin ends and fish pins
- Delivering continuous rod strings (when equipped with Lifting Solutions transport trailer)
