

TRUCK MOUNTED GRIPPER

FLEXIBLE SERVICE OPTIONS

VERSATILE TRANSPORT

The Lifting Solutions Truck Mounted Gripper (TMG) is a mobile unit designed to transport and operate a continuous rod gripper. The versatile TMG gripper can pull and run any brand, size or shape of continuous rod working in conjunction with a workover rig or any mobile well service equipment that can hang the gripper over the wellhead. The TMG enables more flexible service options to pull and run continuous rod.

FEATURES AND BENEFITS

- Equipped with standardized operating console and electronic display rod counter and rate system.
- Self-supported with a 3" annular rod blowout preventer (BOP) rated to 3000 psi, and a hydraulically-activated rod safety clamp with accumulator backup operating systems.
- Designed to transport a service reel on the TMG deck, increasing efficiency when staging multiple jobs.
- Certified, lightweight continuous rod guide designed with quick connect system for rapid set-up and deployment.
- Open faced continuous rod gripper for quick and efficient set up on the well.
- Truck mounted knuckle boom crane used to set the continuous rod gripper over the wellhead.

APPLICATIONS

Continuous rod interventions:

- Installing, surfacing, and fishing Endless Rod[®] strings
- Changing insert pumps
- Progressing Cavity Pump rotor replacement

SPECIFICATIONS

Maximum pull capacity	50,000 lb
Gripper speed	100 ft/min.
Blow out preventer	3" annular rod BOP rating – 3000 psi
Rig-in/rig-out time	15-30 mins
