

# Take Control of Your PC Pump Performance, Your Well Deserves a Second Chance.

## The PivotAL™

If you're working over wells, you know tubing pulls can be costly. There is a smarter, simpler path to restoring performance without pulling tubing.

Meet the PivotAL Progressing Cavity Pump, engineered to give your well a second life. When elastomer wear, fatigue, or harsh downhole conditions start cutting into runtime, PivotAL steps in to restore efficiency and dramatically reduce costly tubing pulls.

**7X THE RUNTIME | OVER \$5,000,000 SAVED**

### Extended Pump Life

Designed to last longer than conventional pumps, saving on replacements.

### Efficiency Recovery

Regain pump efficiency with a simple rod positioning job.

### Reduced Workover Costs

Eliminates costly tubing pulls, lowering operating expenses.

### Proven Fix for Tough Wells

Improved runtime and less elastomer driven failures.

Ready to restore performance and save millions? Let's talk.
