

Powering Performance in Artificial Lift

Struggling with Lift
Performance? We Help
You Maximize Production
and Minimize Costs.

How We Help Solve Your Lift Challenges

At Lifting Solutions, we understand the pressure to keep wells running efficiently. That's why we engineer high-performance artificial lift systems backed by global expertise and proven results.

Performance That Outpaces the Market

Our products are engineered to your well's exact needs—delivering consistent, measurable performance that helps you lower OPEX and boost production.

Innovation That Drives Results

We invest in breakthrough technologies and digital tools that integrate seamlessly into our high-performance solutions—so you stay ahead of the curve.

Global Reach, Local Expertise

From North America to Asia-Pacific, our global team understands the unique challenges of your wellsite—wherever you operate.

Built on Quality

Our vertically integrated manufacturing model ensures end-to-end quality control. We're ISO 9001:2015 certified and committed to delivering excellence at every step.

ENDLESS ROD is a trademark owned by Lifting Solutions Inc. This trademark is currently registered in Canada, USA, Oman and Colombia.

The Path to Performance

The LS Path to Performance is a clear, simple demonstration of what our clients can expect when they work with our team. From conception to ongoing performance, our team of artificial lift specialists are here to help solve your lift challenges.

Our Solutions

PROGRESSING CAVITY PUMPS (PCP)

- Designed to outperform in the field
- Backed by ISO 15136-1 compliance and rigorous lab validation
- Over 26,000 pumps installed globally
- 75,000 sq. ft. facility

ENDLESS ROD® SYSTEMS

- The industry's leading continuous rod solution
- 45+ million feet installed worldwide
- Manufactured in Canada and Oman
- Supported by the world's largest service fleet (125 units)

ENDLESS ROD® SERVICES

- Fast, reliable field support from expert technicians
- Precision manufacturing and quality control
- Proven performance that reduces operating costs
